

# Staff Architect

ST. LOUIS, MO

Rosemann & Associates, PC, is a leading architecture and structural engineering firm committed to a tradition of building beautiful communities and living environments for every generation. We deliver mindful, maintainable housing solutions cultivated over three decades of examining how people live and interact. Our 4 office locations (Denver, Kansas City, St. Louis, Atlanta) operate as one company, stressing collaboration and communication to achieve universal success.

Due to responsible growth and a strong project backlog, we have an immediate need to hire a Staff Architect, based in our St. Louis office. This is a unique opportunity to join an established, reputable architectural firm as we aim to grow our nationwide footprint and build a winning team of local architects to support that growth.

Our ideal candidate is self-motivated, deadline-oriented, and has a strong desire to learn and improve their craft. We offer a fast-paced, small business atmosphere, with the tools, support, and earnings potential of a larger, proven organization to aid in overall career development.

## POSITION SUMMARY

This position performs design, compiles data, executes architectural drawings, and prepares project documentation appropriate to each phase of a project for structures such as multifamily residences, senior living communities, student housing and other typologies. While this position typically works under general supervision, the candidate is expected to rely on their experience and judgment to plan and accomplish goals. The candidate must be familiar with industry standard concepts, practices, and procedures.

## RESPONSIBILITIES

- Develop designs from concept through design development to contract documents
- Understand the technical implications of design decisions and contribute to the documentation of practical, buildable details
- Incorporate applicable codes, construction techniques, and sequences
- Update and maintain design, detail, and materials libraries with vetted, code-compliant building elements
- Collaborate and communicate effectively with owners, clients, subconsultants, and other project partners during all phases of design and drawing production
- Conduct construction administration and periodic on-site observation of work during construction to monitor compliance with plans
- Participate in industry events and begin to build a professional network of clients, consultants, and peers

## QUALIFICATIONS

- Accredited Architecture Degree
- 2+ years of related experience
- Strong technical competency, proficient in Revit, AutoCAD, Bluebeam, Enscape, Adobe Creative Cloud, and similar software
- Comfortable generating design concepts in hand sketch form

- Thorough knowledge of the design and construction documentation process
- Ability to understand and develop architectural ideas, independently and collaboratively
- Comfortable communicating with clients/consultants
- Knowledge of multifamily architecture and building design
- Entrepreneurial spirit, interested in being a part of a growing office

### WHY WORK WITH ROSEMANN?

With a niche focus on multifamily housing, we offer a career of fulfillment and purpose, designing homes and residences for our community. A family-run business, Rosemann & Associates perpetuates a tight-knit, values-driven culture where our people are valued and appreciated. This means leadership attention to maintaining a true work-life balance and flexible work opportunities. With a focus on professional growth and career-long advancement opportunity, we stress individual project ownership and follow through with staff participation from concept through construction administration. We also offer a highly competitive benefits package including 401K match and comprehensive healthcare/vision/dental insurance.
